# SUBJECT INDEX, VOLUME 14

Acoustic emission in crazing of polyvinyltoluene, 651
Adhesion of selenium to polymeric films, 1305
Adsorption: see sorption
Amylose, dynamic mechanical properties of, 111
Anisotropy of dielectric relaxation in poly(ethylene terephthalate), 1591
Annealing
  of poly(butylene terephthalate), 2113
  of polyethylene, 2137
  of polypropylene, effect on viscoelasticity, 1221
BBB heterocyclic polymer
  thermal mechanical properties of, 451, 1721
  viscometry of concentrated solutions of, 1717
Birefringence
  in extension of polybutadiene, 509
  in extension of polyisobutylene, 2129
  in flowing polyethylene oxide solutions, 1111, 1121
  of poly(ethylene terephthalate), 575
  of swollen SBS block copolymer, 833, 847
Bisphenol-A polycarbonate
  Brillouin scattering from, 741
  glass transition affected by plasticizers in, 1187
  kinetics of crystallization of, 1367
Brillouin light scattering
  from amorphous bisphenol-A polycarbonate, 741
  from amorphous poly(ethylene terephthalate), 1909
  from polymer films, 143
  from poly(propylene oxide) solutions, 1877
ϵ-Caprolactone-γ-(ℓ-butyl)-ϵ-caprolactone copolymers, dynamic mechanical properties of, 2011
Cellodextrin alditols, hydrodynamic properties of, 2047
Cellophane
  and acid degradation of, 125
  dynamic mechanical properties of, 111, 125
Cellulose, crystallization of, 1913
Chain conformation and packing in polyethylene, 783
Chain dimensions
  of polychloroprenes, 619
  of styrene–acrylonitrile copolymers, 759
  of styrene–methyl methacrylate copolymers, 759
Chain dynamics
  in poly(γ-benzyl glutamate), 1979
  in poly(methyl D-glutamate), 401
  in polystyrene solutions, 11, 29
Chloroprene-methyl methacrylate copolymers, preparation and characterization of, 165
Chromatography: see gel permeation chromatography
Collagen, environmental effects on mechanical properties of, 2195
Conduction, electrical
  in sulfonated polystyrene–polyethylene graft copolymers, 1769
  of ionic complexes above the glass transition temperature, 955
Conformation of chains in polydimethylsiloxane, 643
Copolymers
  ABA block, dynamic viscoelastic behavior of, 1133
  ϵ-caprolactone-γ-(ℓ-butyl)-ϵ-caprolactone, dynamic mechanical properties of, 2011
  chloroprene–methyl methacrylate, preparation and characterization of, 165
  ethyl acrylate–acrylic acid, neutralized ionomers of, 1201
  ethylene–chlorotrifluoroethylene, molecular transitions in, 1021
  ethylene–propylene, intrinsic viscosities of, 1629
  grafted polyethylene–sulfonated polystyrene, ionic transport in, 1769
  hydrolyzed ethylene–vinyl acetate, NMR of, 343
  styrene–acrylonitrile, intrinsic viscosity of, 749, 759
  styrene–butadiene-styrene block, optical and swelling properties of, 833, 847
  styrene-ethylene oxide block, rapid x-ray study of crystallization of, 2291
  styrene–ethylene oxide block, solution behavior of, 135
  styrene–ethylene oxide block, surface properties of, 1287
  styrene–methyl methacrylate, intrinsic viscosity of, 749, 759
  surface area of copolymer latex particles, 1451
Craze, stress distribution along, 93
Crazing
  effect of strain rate on, 723
  of polycarbonate, 723

of polychlorotrifluoroethylene, 723
of poly(methyl methacrylate), 703, 723, 2095
of polysulfone, 723
of poly(vinyl chloride), 2095
of polyvinyltoluene, acoustic emission in, 651
Critical opalescence in ternary systems, 1967
Critical temperature in aqueous solutions of poly(ethylene oxide) and salts, 2241
Crosslinked polymers
crystallization under stress (theory), 1827
mechanical properties of collagen fibers, 2195
networks from linear polyethylene crosslinked in solution, 187
viscoelastic properties of poly(hydroxyethyl methacrylate) networks, 285
Crystal structure
of Kapton H polyimide, 1553
of polydiketene, 81
of polymers exhibiting side-chain crystallization, 1241
of poly(phenylene isophthalamide), 427
Crystallinity
of blends of poly(ε-caprolactone) and poly(vinyl chloride), 1391
of poly(ethylene terephthalate), 575
of poly(*N*-vinylcarbazole) as a function of molecular weight, 1433
Crystallites
in drawn poly(ethylene terephthalate) fibers, 373
in polyethylene and polyoxymethylene, sizes of, 317
Crystallization
at high pressure in polyisoprene, 391
model for homogeneous nucleation in, 2211
of bisphenol-A polycarbonate, 1367
of cellulose, 1913
of crosslinked networks under stress (theory), 1827
of poly(ethylene terephthalate), 591
of isotactic polystyrene, 1177
of polysulfur nitride, 1813, 2017
of poly(vinylidene fluoride), 1683, 2325
rapid x-ray study of crystallization behavior, 2291
solvent effects on polyethylene morphology, 1379
thermal behavior of brominated polybutadiene crystals in phenoxy resins, 2109
Deformation
kink band structures in polyethylene, 1257
of cellulose triacetate lattice by hydration, 565
of nylon-6, 223, 1495
of polyester single crystals, 799
of poly(ethylene terephthalate), 1495
Degradation
mechanical, of polystyrene, 1601
of cellophane by fungal enzymes, 125
of polyoxymethylene, 903
Deoxyribonucleate films, piezoelectric properties of, 63
Depolarization currents
in polyethylene, 531, 543, 1325
in poly(vinylidene fluoride), 989
Dextran, dynamic mechanical properties of, 111
Dielectric properties
of glow-discharge polystyrene, 173
of low loss polyethylenes, 1755
of poly(ethylene oxide) and poly(hexamethylene oxide), 2231
Dielectric relaxation
evaluation of activation energy for, 1801
of amorphous phase in nylon 610, 499
of hydrated poly(L-proline)-II, 211
of oxidized and chlorinated polyethylenes, 2153
of polycarbonate, 1297
of poly(ethylene terephthalate), 1591
of poly(propylene oxide), 1877
of polystyrene with sorbed oxygen, 1871
of poly(vinyl chloride) in tetrahydrofuran, 2219
of sodium polyphosphates, 773
of vinyl aromatic polymers, 2285
Differential scanning calorimetry (DSC)
of BBB polymer films, 1721
of bisphenol-A polycarbonate with plasticizers, 1187
of brominated polybutadiene, 151
of isotactic polystyrene gels, 39
of polybutadiene crystals, 323
of poly(butylene terephthalate), 2113
of polycarbonate, 1053
of polyethylene, 187, 811, 1659, 2137
of poly(vinyl chloride), 1087
of segmented polyurethane, 1047
Differential thermal analysis of poly(vinyl chloride) in tetrahydrofuran, 2219
Diffusion
in dilute polystyrene solutions, 101
of cellodextrin alditols in dilute NaOH, 2047
of gases in glassy polymers, 675, 687
of ions in sulfonated polystyrene-polyethylene graft copolymer, 1769
of solvent in glassy poly(vinyl chloride), 981
Dilatometry
of heating and cooling of polystyrene, 1575
of melting of polyethylene, 2057
Dipole orientation processes in polyethylene, 531, 543
Drawing behavior of linear polyethylene, 1641
Dynamic mechanical properties
of ABA block copolymers, 1133, 1149
of BBB polymer films, 1721

of cellophane after biodegradation, 125
of cellophane, amylose, and dextran, 111
of ionene polymers, 2259, 2273
of lactone copolymers, 2011
of polyethylene, 1325, 1659
of poly(methyl D-glutamate), effect of casting solvent on, 963
of poly-α-olefins containing ring structures, 663
of polypropylene, 1221
of styrene ionomer melts, 1211
Electron microscopy
of cellulose, 1913
of high-pressure polyisoprene, 377, 391
of nylon 6 fibers, 485
of polybutadiene crystals, 323
of polycarbonate, 1053
of polyethylene, 479, 555, 1257, 1379
of poly(ethylene terephthalate), 591
of poly(methyl D-glutamate) spherulites, 251
of poly(pentene-1), form III, 1161
of polypropylene, 1221, 1611
of polystyrene, 1177
of poly(*N*-vinylcarbazole), 1433
of SBS block copolymer, 847, 861
Electron spin resonance (ESR), spin-probe investigation of polybutadiene crystals, 275
Ethylene–chlorotrifluoroethylene copolymer, molecular transitions in, 1021
Ethylene–propylene copolymers, intrinsic viscosities of, 1629
Ethylene–vinyl acetate copolymers, hydrolyzed, NMR study of, 343
Exclusion chromatography: see gel permeation chromatography
Expansion coefficient of polyelectrolytes, 1015
Filled polymers, relation of modulus to composition of, 2073

  of polypropylene, 1693, 2083

of polystyrene, 2083
of poly(vinylidene fluoride), 1271
of segmented polyurethane, 1047
of styrene–ethylene oxide block copolymers, 135
Nucleation, heterogeneous, in phase transitions (theory), 2253
Nucleation, homogeneous, model for crystallization, 2211
Nylon 6
crystal orientation mechanism in stretching of, 223
effect of cyclic loading on, 2313
light scattering from, 1495
morphology of fibers of, 485
swelling with water, 1513
thermal effects on crystal dimensions of, 1527
x-ray diffractions of, 921, 941
Nylon 66, x-ray diffraction of blends with PEG, 559
Nylon 610, dielectric properties of, 499
Optical anisotropy in swollen SBS copolymer, 833, 847
Optical microscopy
of blends of poly(ϵ-caprolactone) and poly(vinyl chloride), 1391
of crazes, 723
of deformed polyester single crystals, 799
of poly(methyl D-glutamate) spherulites, 251
of poly(methyl D-glutamate) cast films, 963
Optical properties of polydiacetylenes, 2037
Osmotic coefficient of polyelectrolyte with counterions, 1005
Osmotic pressure
of amylose solutions, 1485
of polychloroprene solutions, 619
Permeable interpolymer membranes for ion-exchange, 1839, 1855
Permeation of glassy polymers by gases, 675, 687, 1903
Phase separation
in bisphenol-A polycarbonate with plasticizers, 1187
in solutions of incompatible polymers, 1943, 1967
Phase transition
in polybutadiene, Raman study of, 521
theory for heterogeneous nucleation in, I
Phenoxy resins, single crystals in, 2109
Photoconductivity of poly(*N*-acryloylcarbazole), 869
Piezoelectric effects
in cellulose triacetate, 565
in doxyribonucleate films, 63
in poly(γ-benzyl glutamate), 1979
in poly(methyl D-glutamate), 401
in poly(vinylidene fluoride), 989
Poly(*N*-acryloylcarbazole), photoconductivity of, 869
Poly(γ-benzyl glutamate), piezoelectric effects in, 1979
Poly[*bis*(*m*-chlorophenoxy)phosphazene], molecular weight distribution of, 367
Polybutadiene
luminescence decay following irradiation of, 437
morphology and thermodynamic properties of crystals of, 275
Raman study of phase transition in, 521
spin-probe (ESR) investigation of crystals of, 275
stress relaxation and birefrigence in, 509
thermal behavior of brominated crystals of, 151
thermal viscoelastic behavior of, 1891
Poly(butylene terephthalate), effect of annealing on, 2113
Poly(ϵ-caprolactone), morphology of blends of poly(vinyl chloride) with, 1391
Polycarbonate: see also bisphenol-A polycarbonate
dielectric relaxation of, 1297
fracture toughness of, 897
permeation and diffusion of carbon dioxide in, 687, 1903
strain rate and crazing of, 723
structure and mechanical properties of, 1053
Polychloroprene, configuration in solution of, 619
Polydiacetylenes, optical properties of, 2037
Polydiketene, crystal structure of, 81
Polydimethylsiloxane
neutron scattering in, 1077
Raman study of helix formation in, 643
Polyelectrolytes
conductivity and counterion mobility in solid copolymers, 1769
dielectric behavior of sodium polyphosphates, 773
expansion coefficient of, 1015
glass transitions of metal salts of ethyl acrylate–acrylic acid copolymers, 1201
ionenes, mechanical relaxations in, 2259, 2273
osmotic coefficient of, 1005
potentiometric titration of gels of, 1317
sulfonate-containing, ion binding in, 239
Polyethylene
annealing and anisotropy in, 769
chain conformation in, 783
crosslinking in solutions of, 187
crystallites in single crystals of, 317
deformation structures in, 1257
depolarization currents in, 531, 543
dielectric relaxation in oxidized and chlorinated derivatives of, 2153

drawing behavior of, 1641
electron microscopy of molecules of, 479
environmental cracking of, 1567
interface melting in, 555
irradiated, dynamic mechanical relaxation and depolarization currents in, 1325
limiting elastic modulus of, 913
mechanical relaxations in, 1659
melting behavior (dilatometry) of, 2057
melting behavior (DSC) of, 811
neutron scattering in, 1351
polymerized in various solvents, 1379
rapid x-ray study of crystallization of, 2291
reduction of dielectric loss in, 1755
specific heat after annealing of, 2119
thermal effects on crystal dimensions of, 821, 1527
thermal noise in melting of, 1157
Polyethylene oxide
dielectric properties of, 2231
effect of salts on aqueous solution properties of, 2241
flow birefringence in solutions of, 1111, 1121
Poly(ethylene terephthalate)
amorphous, x-ray scattering from, 415
Brillouin scattering from, 1909
dielectric relaxation in, 1591
infrared spectra of, 1731
light scattering from, 1495
mechanical properties of, 263, 591
morphology of, 591
thermal shrinkage of, 575
vibrational spectra of, 1029, 1461
Poly(hexamethylene oxide), dielectric properties of, 2231
Poly(2-hydroxyethyl methacrylate), crosslinked networks of, 285
Polyimides, x-ray study of Kapton H, 1553
Polyisobutylene
birefringence and stress relaxation in, 2129
incompatibility in solution with polystyrene, 1943, 1953, 1967
NMR study of, 1789
Polyisoprene, morphology of high-pressure phase in, 377, 391
Poly(methyl D-glutamate)
effect of casting solvent on properties of, 963
piezoelectric properties of, 401
spherulites of, 251
Poly(methyl methacrylate)
crazing of, 2095
effect of cyclic loading on, 2313
mechanical behavior and crazing of, 723
mechanical behavior under pressure, 703
persistence vectors for, 1425
Poly(octadecyl methacrylate), side-chain crystallites in, 1241
Poly-α-olefins containing ring structures, dynamic mechanical properties of, 663
Polyoxyalkanes, persistence vectors for, 1337
Polyoxyethylene, light scattering from hedrites in, 181
Polyoxymethylene
crystallites in single crystals of, 317
light scattering from hedrites in, 181
thermal degradation of, 903
Poly(pentene-1), structure of form III of, 1161
Poly(phenylene isophthalamide), crystal structure of, 427
Poly(L-proline) II, dielectric behavior of, 211
Polypropylene
$^{13}C$ NMR study of, 1693, 2083
effect of swelling and annealing on viscoelastic behavior of, 1221
mechanical behavior of, 1611
persistence vectors for, 1425
springy, infrared spectra of, 603
Poly(propylene oxide), dielectric relaxation and Brillouin scattering in, 1877
Polysaccharides, mechanical loss processes in, 111
Polystyrene
$^{13}C$ NMR study of, 2083
crosslinked, light scattering from gels of, 1097
diffusion in dilute solutions of, 101
effect of oxygen on dielectric relaxations in, 1871
fluorescence polarization in solutions of, 11, 29
glow-discharge, dielectric properties of, 173
glow-discharge, NMR study of, 1917
GPC of high molecular weight fractions of, 2105
GPC with poor and theta solvents for, 569
incompatibility in solutions with polyisobutylene, 1943, 1953, 1967
isotactic, gels of, 39
mechanical degradation of, 1601
morphology and thermal history of, 1177
neutron scattering in networks of, 2119
nonlinear viscoelasticity in concentrated solutions of, 1701
persistence vectors for, 1425
viscoelastic properties of low molecular weight melts of, 1361
viscosity-concentration correlation in solutions of, 299
volume change on heating and cooling of, 1575
Poly(styrene sulfonic acid) in ion-exchange membranes, 1839, 1855
Polysulfur nitride
defects in crystals of, 2017
theory of crystallization of, 1813
Polytetrafluoroethylene in plasma-polymerized films on silicon, 879

Polyurethane, segmented, calorimetric and NMR study of, 1047
Poly(vinyl anthracenes), dielectric relaxations in, 2285
Poly(*N*-vinylcarbazole)
  strains in cast films of, 1311
  structure-chain length correlations in, 1433
Poly(vinyl chloride)
  crazing of, 2095
  enthalpy relaxation of, 1087
  kinetics of swelling of, 981
  morphology of blends of poly($\epsilon$-caprolactone) with, 1391
  relaxation processes in tetrahydrofuran solution of, 2219
  x-ray scattering from 353
Poly(vinyl-*N*-ethylcarbazole), dielectric relaxations in, 2285
Poly(vinylidene fluoride)
  crystallization of, 1683, 2325
  depolarization and piezoelectricity of, 989
  in ion-exchange membranes, 1839, 1855
  NMR and molecular motion in, 1271
Polyvinyltoluene, acoustic emission in crazing of, 651
Quasielastic scattering of neutrons by dilute polymer solutions (theory), 1
Radicals, ion recombination luminescence in polybutadiene, 437
Raman spectra
  of crystalline *m*-alkanes, 913
  of polybutadiene, 521
  of polydimethylsiloxane, 643
  of poly(ethylene terephthalate), 1029, 1461
Refractive index increments in copolymer solutions, 749
Relaxation
  enthalpy, of poly(vinyl chloride), 1087
  of ethylene-chlorotrifluoroethylene copolymer, 1021
  of polystyrene chains in solutions, 11, 29
Rubbery polymers
  stress relaxation and chain length distribution in elastomers, 177
  thermal creep of polybutadiene, 1891
Second virial coefficient, 1953
Side-chain crystallites in polymers, 1241
Sorption of gas in glassy polymers, 1903
Sorption of water
  deformation of cellulose triacetate lattice by, 565
  in ionenes, 2273
  mechanical loss in polysaccharides affected by, 111
  swelling of nylon 6 film by, 1513
Spherulites
  in high-pressure polyisoprene, 377, 391
  in nylon 6, deformation of, 223
  light scattering from, 1743
  of poly(methyl D-glutamate), 251
Statistical mechanics
  persistence vectors and higher moment tensors of polyoxyalkanes, 1337
  persistence vectors for polypropylene, polystyrene, and poly(methyl methacrylate) chains, 1425
Strain birefringence in polybutadiene, 509
Strains in solvent-cast films, 1311
Stress cracking, environmental, of polyethylene, 1567
Stress distribution along a craze, 93
Stress relaxation
  and chain length distribution in elastomers, 177
  in polybutadiene, 509
  in polyisobutylene, 2129
Stress-strain relations
  in cast films of poly(methyl D-glutamate), 963
  in collagen hollow fibers, 2195
  in polybutadiene, 1891
  in polycarbonate, 723
  in poly(ethylene terephthalate) fibers, 263
  in poly(methyl methacrylate), 703, 723
  in polypropylene, 1611
Styrene–acrylonitrile copolymers, intrinsic viscosity of, 749, 759
Styrene–butadiene–styrene block copolymer
  dynamic mechanical properties of, 1133
  melt viscosity of, 1149
  optical and swelling properties of, 833, 847
Styrene–ethylene oxide block copolymers
  solution behavior of, 135
  surface properties of, 1287
Styrene ionomers, melt properties of, 1211
Styrene–isoprene–styrene block copolymers, dynamic mechanical properties of, 1133
Styrene–methyl methacrylate copolymers, intrinsic viscosity of, 749, 759
Surface area of latex particles, 1451
Surface properties of styrene–ethylene oxide block copolymers, 1287
Surface tension measurements in latex dispersions, 1451
Swelling
  of crosslinked polyethylene networks, 187
  of networks, molecular weight dependence of, 1097
  of nylon 6 with water, 1513
  of polypropylene, effect on viscoelasticity of, 1221
  of SBS block copolymer, 833
  of surface layer of poly(vinyl chloride), 981
  titration of swollen polyelectrolyte gels, 1317
Thermal behavior of glasses, 1575
Thermal effects on long spacing in oriented polyethylene, 821

Thermal expansion in polydiacetylene single crystal, 1235
Thermal noise in melting of polyethylene, 1157
Thermal shrinkage of poly(ethylene terephthalate), 575
Thermodynamic parameters
of crystalline polybutadiene, 323
of fluoroethylene polymers, 1683
Thermodynamics of GPC separation, 569
Thermoelastic properties of polychloroprene networks, 619
Thermomechanical study of tensile creep and recovery in heterocyclic BBB polymer, 451
Transport behavior in interpolymer ion-exchange membranes, 1839, 1855
Ultrafiltration with interpolymer ion-exchange membranes, 1855
Ultraviolet spectrum of poly(*N*-acryloylcarbazole), 869
Viscoelastic properties
of gels from light scattering, 1097
of polybutadiene, 1891
of poly(ethylene terephthalate) 591
of polyethylene under environmental stress, 1567
of poly(hydroxyethyl methacrylate) networks, 285
of polystyrene melts, 1361
of polystyrene solutions, 1701
Viscosity
activation energy for viscous flow of melts, 1725
of concentrated solutions of heterocyclic BBB polymer, 1717
of SBS block copolymer melts, 1149
of styrene ionomer melts, 1211
reduction of melt viscosity of Viton A by additive, 1729
Viscosity of solutions
correlations for molecular weight and concentration dependence of, 299
of styrene–ethylene oxide block copolymers, 135
Wettability of plasma-polarized tetrafluoroethylenes, 879
X-ray diffraction
during melt crystallization of polymers, 2291
of blends of poly(ε-caprolactone) with poly(vinyl chloride), 1391
of cellulose triacetate, 565
of ionenes, 2259, 2273
of isotactic polystyrene gels, 39
of Kapton H polyamide, 1553
of nylon 6, 223, 921, 941, 1495, 1527
of nylon-PEG blends, 559
of polybutadiene crystals, 323
of polydiacetylene, 1235
of polydiketene, 81
of polyethylene, 317, 821, 1527, 1659
of poly(ethylene terephthalate), 373, 415, 575, 1495
of poly(methyl D-glutamate), 251
of polyoxymethylene, 317, 903
of poly(pentene-1), form III, 1161
of poly(phenylene isophthalamide), 427
of polypropylene, 1221
of polystyrene, 1177
of poly(*N*-vinyl carbazole), 1433
of poly(vinyl chloride), 353
X-ray photoelectron spectroscopy of Teflon and plasma-polymerized tetrafluoroethylenes, 879

Statement of ownership, management, and circulation (Act of August 12, 1970: Section 3685, Title 39 United States Code)

1. Title of Publication: JOURNAL OF POLYMER SCIENCE
2. Date of filing: September 29, 1976
3. Frequency of issue: Monthly, in 3 sections (Polymer Chemistry, Physics and Letters)
   A. No. of issues published annually: 36
   B. Annual subscription price: $425.00
4. Location of known office of publication: John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016
5. Location of headquarters of general business offices of publishers: John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016
6. Name and complete addresses of publisher, editor, and managing editor: *Publisher:* John Wiley & Sons, Inc., 605 Third Avenue, New York, N.Y. 10016. *Editors:* H. Mark, Polytechnic Institute of New York, 333 Jay Street, Brooklyn, N.Y. 11201, C. G. Overberger, Dept. of Chemistry, University of Michigan, Ann Arbor, Mich. 48104, and T. G. Fox, Carnegie-Mellon University, Pittsburgh, Pa. 15213
   *Managing Editor:* None
7. Owner: John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016

The following is a list of stockholders owning or holding 1% or more of John Wiley & Sons, Inc. stock as of September 11, 1976: Cythia W. Darby, Box 651, Bridgehampton, New York 11932; Hamilton Darby, Box 651, Bridgehampton, New York 11932; Edward P. Hamilton, 605 Third Avenue, New York, New York 10016; W. Bradford Wiley & Francis Lobdell, Trustees, Elizabeth W. Hamilton Trust, 605 Third Avenue, New York, New York 10016; Edward P. Hamilton, Trustee under will of Elizabeth Wiley Hamilton, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York 10005; I. M. Kolthoff, University of Minnesota, School of Chemistry, Minneapolis, Minnesota; Eric S. Proskauer & Charles H. Lieb, Trustees, u/a by Jenny R. Proskauer, 220 Central Park South, New York, New York 10019; Francis Lobdell & W. Bradford Wiley, Trustees, f/b/o Deborah Elizabeth Wiley, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016; Cynthia W. Darby & Julia Gilbert, Trustees, under will of Kate R. Q. Wiley, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York 10005; Francis Lobdell & W. Bradford Wiley, Trustees, f/b/o Peter Booth Wiley, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016; Francis Lobdell & W. Bradford Wiley, Trustees, f/b/o William Bradford Wiley II, c/o John Wiley & Sons, Inc., New York, New York 10016; Edward P. Hamilton & Cynthia Wiley Darby, Trustees, under will of William O. Wiley, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York 10005; Adele E. Windheim, 8 Dundee Road, Larchmont, New York; W. Bradford Wiley & E. P. Hamilton, Trustees for Edward P. Hamilton Foundation, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016; Mrs. Rosamond R. Pennywitt, 49 Bristol Place, Bay Head, New Jersey 08742; Drexel Burnham & Co., 60 Broad Street, New York, New York; Mass. State Carpenters Fund, Hermitage Bldg., 1 Militia Drive, Lexington, Mass. 02173; Bankers Trust Company, 16 Wall Street, New York, New York 10015; National Bank of Detroit, Woodward Avenue, Detroit, Michigan; Riggs National Bank of Washington, D.C., 1508 H Street, N.W., Washington, D.C.; Manufacturers Hanover Trust Company, 350 Park Avenue, New York, New York 10022; Bank of New York, P.O. Box 11 203, New York, New York 10249; Morgan Guaranty Trust Company, 23 Wall Street, New York, New York 10015; Bradford Trust Company, 95 Wall Street, New York, New York 10005.

8. Known bondholders, mortgagees, and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages, or other securities: None
9. Not applicable.

| 10. Extend and nature of circulation | Average no. copies each issue during preceding 12 months | Actual no. copies of single issue published nearest to filing date |
|---|---|---|
| A. Total no. copies printed (*net press run*) | 2800 | 2800 |
| B. Paid circulation | | |
| 1. Sales through dealers and carriers, street vendors and counter sales | — | — |
| 2. Mail subscriptions | 2212 | 2212 |
| C. Total paid circulation (*sum of 10B1 and 10B2*) | 2212 | 2212 |
| D. Free samples, complimentary, and other free copies distribution by mail, carrier or other means | 145 | 145 |
| E. Total distribution (*Sum of C and D*) | 2357 | 2357 |
| F. Copies not distributed | | |
| 1. Office use, left over, unaccounted, spoiled after printing | 443 | 443 |
| 2. Returns from news agents | — | — |
| G. Total (*Sum of E, F1 and 2—should equal net press run shown in A*) | 2800 | 2800 |

11. For completion by publishers mailing at the regular rates (*Section 132.121, Postal Service Manual*)
39 U. S. C. 3626 provides in pertinent part: "No person who would have been entitled to mail matter under former section 4359 of this title shall mail such matter at the rates provided under this subsection unless he files annually with the Postal Service a written request for permission to mail matter at such rates." In accordance with the provisions of this statute, I hereby request permission to mail the publication named in Item 1 at the phased postage rates presently authorized by 39 U. S. C. 3626.

(Signature and title of editor, publisher, business manager, or owner), Allan Wittman, Publisher.

I certify that the statements made by me above are correct and complete. (Signature and title of editor, business manager, or owner)

# CONTENTS

## Vol. 14, Issue Nos. 1–12

### ISSUE NO. 1, JANUARY

Z. AKCASU and H. GUROL: Quasielastic Scattering by Dilute Polymer Solutions ..... 1

B. VALEUR and L. MONNERIE: Dynamics of Macromolecular Chains. III. Time-Dependent Fluorescence Polarization Studies of Local Motions of Polystyrene in Solution .. 11

B. VALEUR and L. MONNERIE: Dynamics of Macromolecular Chains. IV. Quenching and Fluorescence Polarization Studies of Polystyrene in Solution ..... 29

M. GIROLAMO, A. KELLER, K. MIYASAKA, and N. OVERBERGH: Gelation-Crystallization in Isotactic Polystyrene Solutions and Its Implications to Crystal Morphology, to the Origin and Structure of Gels, and to the Chemical Homogeneity of Polyolefins ..... 39

Y. ANDO and E. FUKUDA: Piezoelectric Properties of Oriented Deoxyribonucleate Films . 63

M. YOKOUCHI, Y. CHATANI, and H. TADOKORO: Structural Studies of Polyesters. VIII. Molecular and Crystal Structure of Polydiketene ..... 81

N. VERHEULPEN-HEYMANS: Stress Distribution Along a Craze: Some Consequences of Knight's Analysis ..... 93

J. S. VRENTAS and J. L. DUDA: Diffusion in Dilute Polystyrene Solutions ..... 101

S. A. BRADLEY and S. H CARR: Mechanical Loss Processes in Polysaccharides ..... 111

S. A. BRADLEY and S. H. CARR: Effect of Fungal Degradation on Mechanical Properties of Cellophane ..... 125

K. NAKAMURA, R. ENDO, and M. TAKEDA: Solution Behavior of Styrene–Ethylene Oxide Block Copolymers ..... 135

G. D. PATTERSON: Brillouin Scattering from Polymer Films ..... 143

A. MARCHETTI and E. MARTUSCELLI: Bromination of Single Crystals of *trans*-1,4-Polybutadiene. Thermal Behavior ..... 151

A. A. KHAN and E. G. BRAME, JR.: Preparation and Characteristics of Copolymers of Chloroprene and Methyl Methacrylate ..... 165

NOTES

G. SAWA, K. SUSUKI, S. MORITA, and M. IEDA: Effects of Polymerization Conditions on Dielectric Properties of Polystyrene Formed in a Glow Discharge ..... 173

J. G. CURRO: A Technique for Determination of the Chain Length Distribution from Stress Relaxation Measurements in Certain Elastomers ..... 177

A. GALESKI and M. KRYSZEWSKI: Small-Angle Light Scattering from Square and Hexagonal Hedrites ..... 181

### ISSUE NO. 2, FEBRUARY

A. P. DE BOER and A. J. PENNINGS: Polyethylene Networks Crosslinked in Solution: Preparation, Elastic Behavior, and Oriented Crystallization. I. Crosslinking in Solution ..... 187

J. GUILLET, G. SEYTRE, J. F. MAY, D. CHATAIN, and C. LACABANNE: Low-Frequency Dielectric Behavior of Hydrated Poly(L-proline) II ..... 211

M. MATSUO, H. HATTORI, S. NOMURA, and H. KAWAI: Crystal Orientation in a Semicrystalline Polymer in Relation to Deformation of Polymer Spherulites. IV. Crystal Orientation Mechanisms of Nylon-6 under Uniaxial Stretching ..... 223

J. S. TAN and P. R. MARCUS: Ion Binding in Sulfonate-Containing Polyelectrolytes .... 239
